

How to Add Upswing Into Your Canvas LMS as an Administrator

Prior to working with your Canvas LMS, Upswing will work with your IT team to set up Single Sign-On (SSO) using either LDAP or SAML. These two SSO integration methods are widely used across nearly every institution in the United States.

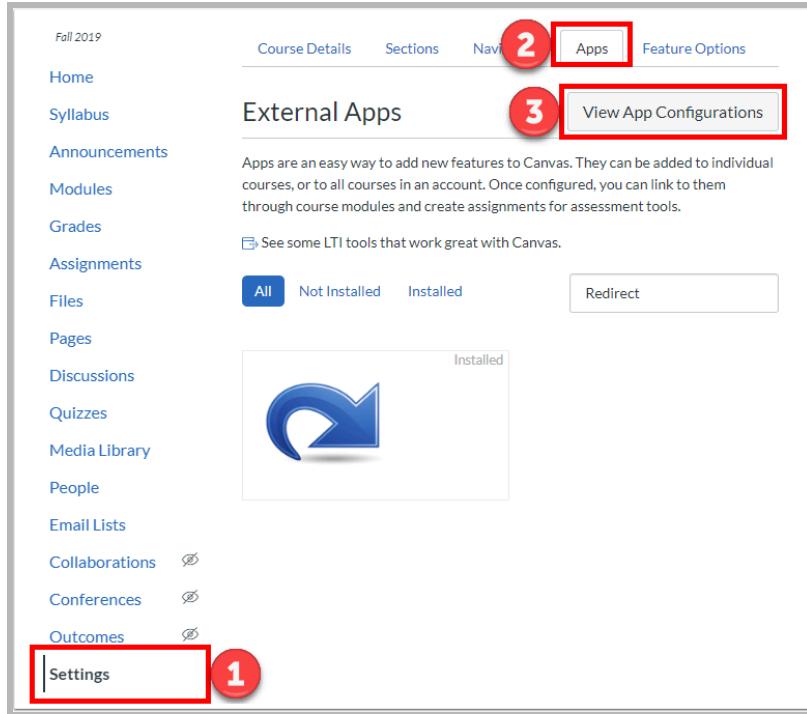

After Upswing and your institution has completed SSO integration, your students will be able to access Upswing directly from within their Canvas LMS portal, without needing to login again.

For SSO documentation setup, please [click here](#), or request the documentation from your Upswing representative.

1. Install the Navigation - Redirect Tool

- Click on the Settings Menu
- Then select the “Apps” Tab
- On the “Apps” Page, click on the “Redirect Tool” Icon
- On the External Tools > Redirect Tool page click +Add App

Apps are an easy way to add new features to Canvas. They can be added to individual courses, or to all courses in an account. Once configured, you can link to them through course modules and create assignments for assessment tools.
